Voicebox

Mac · Windows · Docker

github.com/jamiepine/voicebox

Your own voice studio. An open-source AI voice studio that runs locally: clone a voice, generate speech, dictate into any app and talk to agents in voices you own.

DOWNLOAD

```
voicebox.sh (macOS DMG, Windows MSI, or docker compose up)
```

Only clone your own voice, or a voice you have clear permission to use.

3

OpenMontage

Python · your AI coding assistant

github.com/calestio/OpenMontage

A full AI video studio. An open-source, agentic video production system: your AI coding assistant runs the pipelines from script to finished video.

YOU NEED

Python 3.10+, FFmpeg, Node.js 18+ and an AI coding assistant (Claude Code, Cursor, Copilot, Windsurf or Codex). Follow the Quick Start in the README.

AGPL-3.0 license.

2

World Monitor

Web · runs locally

github.com/koala73/worldmonitor

A live dashboard for the planet. A real-time global intelligence dashboard: AI-summarized news, geopolitical monitoring and infrastructure tracking on a 3D globe.

RUN IT

```
git clone https://github.com/koala73/worldmonitor.git
cd worldmonitor && npm install && npm run dev
```

Or just open worldmonitor.app

Career-Ops

Node.js · Claude Code / Gemini / Codex

github.com/career-ops-hq/career-ops

Your AI job hunter. An AI job-search agent: paste a job and it checks if it's still open, scores the fit, tailors your CV and drafts your answers. You press Submit. Its creator: 740 listings, 68 applications, 12 interviews, 1 offer.

QUICK START

```
npx @santifer/career-ops init
```

Always read what it writes before you send it. Your name is on it.
