Coucou

A pet that watches Claude for you

★ 4.6K

4

Second Brain OS

Claude builds your second brain

★ 1.0K

3

Logo Design Skill

Claude becomes a logo designer

★ 2.5K

2

Lemo-Opuscar

Claude directs short films

★ 1.7K

1

Replica

Clone any app, launch it as yours

★ 1.4K

5

Coucou

Mac · iPhone

github.com/Louis-CFM/coucou

A pet that watches Claude for you. A tiny friend that lives in your Mac's notch and keeps an eye on your AI coding agents. Approve permissions, watch Claude work and get pinged the moment it needs you, even on your iPhone.

INSTALL

Download the Mac app from the repo's Releases page
(App Store versions are coming).

4

Second Brain OS

Obsidian

github.com/undefined-ui/second-brain-os

Claude builds your second brain. A knowledge base an AI agent builds and maintains for you in plain markdown files you own. Everything you read and save turns into linked notes you can ask questions.

START HERE

Full guide, vault template and skills:
secondbrainos.dev

Needs Obsidian (free) and an AI agent like Claude Code.

3

Logo Design Skill

Claude Code · Codex · Gemini CLI

github.com/kaankiziltug/logo-design-skill

Claude becomes a logo designer. Turns Claude into a disciplined identity designer, from the brief to production-ready SVG files and brand guidelines, with a reference library of 1,400+ real logos.

INSTALL IN CLAUDE CODE

```
/plugin marketplace add kaankiziltug/logo-design-skill
/plugin install logo-design@logo-design-skill
```

2

Lemo-Opuscar

Claude Code

github.com/lemomo-ai/lemo-opuscar

Claude directs short films. 43 film styles, each with a short film made entirely in code. Pick a style, bring your story, and your coding agent directs the film. No video-generation model involved.

INSTALL

```
claude plugin marketplace add lemomo-ai/lemo-opuscar
claude plugin install lemo-opuscar@lemolab
```

Check the repo's license before using it commercially.

1

Replica

Claude

github.com/Jakeschincariol/replica-skill

Clone any app, launch it as yours. Eleven Claude skills: reverse-engineer an app, rebuild it, test it, fix what its users hate, brand it and put it live on your domain.

INSTALL (PASTE INTO CLAUDE)

```
https://github.com/Jakeschincariol/replica-skill

install skill
```

It rebuilds what an app does, never what it owns: features and flows, not its code, logo, copy or content.
