open-seo-mcp-skills

Claude Code

github.com/Ryze-AI-Adgent/open-seo-mcp-skills

Your SEO agency. A free SEO MCP server plus SEO and GEO skills for Claude: keyword research, rank tracking, site audits, backlinks and competitor gaps, running on your own Google Search Console and GA4 data.

INSTALL IN CLAUDE CODE

```
claude plugin marketplace add Ryze-AI-Adgent/open-seo-mcp-skills
claude plugin install open-seo-mcp-skills@ryze
```

Then: "run an SEO audit on mysite.com"

You connect your own Search Console / GA4 through the Ryze connector.

4

linkedin-agent-skill

Claude

github.com/Jakeschincariol/linkedin-agent-skill

Your social media manager. Eleven Claude skills that run a LinkedIn account: posts from 21 hook formulas, comments, replies, a profile score out of 100 and a weekly plan. Nothing gets posted until you say yes.

INSTALL (PASTE INTO CLAUDE)

```
https://github.com/Jakeschincariol/linkedin-agent-skill
```

Install this skill, then confirm /li-post works.

3

aurelio-finance

Mac · Linux · Windows

github.com/LosaLosSantos/aurelio-finance

Your financial advisor. A wealth-management and financial-planning app that runs on your own computer, with an AI advisor you can talk to. Your records stay on your machine.

TRY IT ON INVENTED DATA

```
git clone https://github.com/LosaLosSantos/aurelio-finance.git
cd aurelio-finance
./start.sh --demo
```

Needs Git, Node.js 22+ and uv. The AI part is optional and uses your own OpenRouter key. It's a tool, not licensed financial advice.

2

Tel-Agent

Self-hosted · Docker

github.com/Dpro-at/Tel-Agent

Your receptionist. Connects a phone line to an AI agent. It answers calls in real time, takes messages, checks a calendar and transfers calls. The same agent can answer SMS, WhatsApp, email and more.

QUICK START

```
git clone https://github.com/Dpro-at/Tel-Agent.git
cd Tel-Agent && cp .env.example .env
docker compose up -d --build
```

Alpha software (AGPL-3.0). You need a SIP phone line and your own AI keys. Tell callers they're talking to an AI.

1

ARTEMIS

Android · by Google

github.com/google/artemis

Your assistant. Lets AI assistants use a real Android phone like a human: it plans, taps and types across apps from plain-English instructions. Over 99% task completion on Google Research's AndroidWorld benchmark.

QUICK START (MACOS / LINUX)

```
git clone https://github.com/google/artemis.git && cd artemis
./start.sh
```

Needs an Android phone with USB debugging (or an emulator). It's built for testing and automation, so try it on a spare device first.
